

Our stone is being utilised for new works currently underway in Canberra, located on State Circle, circumnavigating Australia's Parliament House. This location highlights the sought after quality of Wee Jasper Blue Stone.

The York Park North Tree (Oak) Plantation, located on the corner of Kings Avenue and State Circle, is being upgraded by the National Capital Authority.

Low-height perimeter walls, directional paths and associated landscape works are being built to protect the heritage listed plantation. The new works will improve public access and amenity. The surrounding walls are being constructed of book leaf stone sourced from Wee Jasper Stone.
